

Alice V. White

Alice White was employed by law enforcement agencies for over twenty years. During those years she dedicated herself to the exploration of some of the most difficult challenges in the latent print discipline: defining suitability criteria, broadening conclusion ranges, embracing a human factors approach to quality assurance and management, dissecting distortion interpretation, developing grading metrics for complex tasks during training and proficiency testing, and revolutionizing testimony training. Alice is a life-long learner and shares her knowledge and experiences through active participation in working groups and through the courses she teaches around the globe.
